Note: The guidance for this indicator requires that LOBO loans are shown as maturing at the next possible call date rather than at final maturity. The Council's three LOBO loans are therefore included in the figure maturing in under 12 months. This presentation differs from that in Annex E, where LOBO loans are included at their final maturity date. In the current low interest rate environment the likelihood of the interest rates on these loans being raised and the loans requiring repayment at the break period is extremely low.
